HFC Longevity Sterilised recipes are manufactured from HFC ingredients, that is, originally fit for human consumption and now used in our recipes for cats. The same quality as we would choose for ourselves. HFC Longevity Sterilised with 100% fresh whole meat and 0% meat-and-bone meal or dehydrated meat/fish guarantees high nutritional value and digestibility thanks to reduced storage and processing stages (digestible protein up to 98.73%, University of Teramo study). Complete pet food supplemented with cranberries, chondroitin and glucosamine which, combined with a healthy lifestyle, help support the vitality and well-being of mature adult cats. Ideal for all adult cats, including non-sterilised, thanks to their reduced magnesium levels, moderate fat content and adequate fibre intake. Free from artificial preservatives or colours. Almo Nature recommends rotating recipes regularly, by offering different protein sources and dry and wet recipes to both ensure a varied routine and cater for all tastes. The plastic and aluminium poly-bag, chosen for proper product storage, can be reused to produce energy if disposed of correctly. HFC Longevity Sterilised – 2 kibble recipes for mature adult cats, also not sterilised – available in 300 g and 1.2 kg bags. Almo Nature is the activist pet food brand owned entirely by Fondazione Capellino.
